

The Avtron Gateway enables control of SIGMA LT and SIGMA 2 load banks in a network.

REQUIREMENTS

- Avtron SIGMA 2 or LT load banks
- SIGMA LT or SIGMA 2 control cables
- Latest Gateway software can be downloaded from:
<https://tinyurl.com/rdqczuo>

The SIGMA gateway enables SIGMA 2 or SIGMA LT load banks to be controlled in a network over Modbus TCIP. A total of 25 SIGMA LT and 14 SIGMA 2 load banks are supported.

Hardware

- Robust aluminium construction
- 1 x SIGMA LT Out port
- 2 x SIGMA 2 ports (1 x IN, 1 x OUT)
- 2 x LED status and warning indicators
- 1 x Ethernet (RJ45) port
- 1 x Micro USB port for firmware and protocol updates
